

A Rising Young Democracy

India at a glance

India, the world's most populous democracy, is an exciting emerging market. The country has significant economic growth ahead of it. The population is young, and with a growing middle class, India is becoming more consumption driven. The government has also taken steps to liberalize and modernize the economy, making it more competitive.

- India is following a similar growth path that China started 10 years earlier
- The country has one of the highest domestic savings rates and is among the fastest growing economies in the world
- India has strong local demand along with a growing export led economy
- Nearly 50% of India's population is below the age of 25
- Forecasts suggest 6%-7% real GDP growth annually over the next 5-10 years

Fund Description

The FMG India Fund offers a broad exposure to Indian equities. India has transformed itself from a highly inefficient and slow growing economy to one of the world's fastest growing economies. The investment objective is to achieve long term capital appreciation from underlying portfolios of equities mainly listed on the

stock exchanges in India. The fund utilizes a multi-manager approach. Managers are selected based on their proven expertise in managing Indian equity investments. The fund is actively managed, with FMG applying both a top down macro and a long term quantitative model to determine allocations, including

cash levels between the sectors and market capitalization. FMG considers risk management and fund liquidity an integral element of the portfolio management process, whilst the fund is well diversified among industry sectors. The opportunistic nature of the fund targets investors with a higher risk-reward return profile.
