

## A Rising Young Democracy

## Fund Description

The FMG India Fund offers a broad exposure to Indian equities. India has transformed itself from a highly inefficient and slow growing economy to one of the world's fastest growing economies. The investment objective is to achieve long term capital appreciation from underlying portfolios of equities mainly listed on the stock exchanges in India. The fund utilizes a multi-manager approach. Managers are selected based on their proven expertise in managing Indian equity investments. The fund is actively managed, with FMG applying both a top down macro and a long term quantitative model to determine allocations, including cash levels between the sectors and market capitalization. FMG considers risk management and fund liquidity an integral element of the portfolio management process, whilst the fund is well diversified among industry sectors. The opportunistic nature of the fund targets investors with a higher risk-reward return profile.
